

## OUR LOCATIONS

2 Industrial Parkway, Woburn MA 01801 **781.933.1141**  
 1521 Route 9W, Selkirk NY 12158 **518.767.3590**  
 3 Adler Drive, East Syracuse NY 13057 **800.234.0550**

### PIPE & FITTING

- PVC Schedule 40 & 80
- CPVC Schedule 40 & 80
- Polypropylene
- Polyethylene
- Dual Containment
- Fiberglass
- PVDF
- Halar
- Teflon

### ACID WASTE

- Enfusion Polypropylene
- Enfield Mechanical
- Plenumline PVDF
- Dual Containment
- pH Neutralization Systems
- Spears CPVC Lab Waste

### FABRICATION

- Pump Stations
- Pipe Assemblies
- Cut to Length Pipe Cores
- Custom Tanks
- Underground Valve Vaults
- Chem Fill Stations
- Hose Assemblies
- Storage Solutions
- Field Repair
- Mobile Welding
- Custom Tanks

### TANKS

- Vertical Storage
- Horizontal
- Rectangular & Cylindrical
- Dual Containment
- Custom Sizes
- Bulkheads

### VALVES

- True Union Ball
- Butterfly
- Check - Ball & Wafer
- Diaphragm
- Electrically Actuated
- Solenoid
- Pneumatic
- Gate

### DUAL CONTAINMENT

- Drainage PP, PE & PVDF
- PVC Sch-40, 80 & Clear
- Pressure PP, PE & PVDF
- Carbon & Stainless Steel
- Fiberglass

### INSTRUMENTATION

- Flow
- pH/ORP
- Level
- Rotometer
- Controllers
- Metering Pumps
- Transmitters

### TUBING

- Polyethylene
- Polypropylene
- Teflon
- Speedfit Fittings
- Barbed Fittings
- Braided
- Cam-Lok Fittings

GF Piping Systems

By exceeding our customer's expectations and our competitor's service level we add value to the products we sell and develop the trust and loyalty of our customers.

## CHEMICAL FEED SYSTEMS

Our chemical feed skids are economical and are designed to be used wherever any type of chemical addition is required. We can custom design your skid or wall mountable shelf with many different options to meet your specific needs. Our skids are engineered for easy installation and operation.

- Smaller footprint - Saves floor space
- Labor cost savings - No assembly work
- Single point connections - Quick installation
- Pre-tested package
- Pre-engineered systems
- Various different configurations i.e., style & manufacturers of the pumps, different materials for chemical compatibility, day tanks, splash covers/enclosures
- Designed and custom fabricated to your needs

## CHEMICAL LIFT STATIONS

We fabricate custom fill stations for the water and wastewater treatment market used for bulk chemical deliveries. We can design and fabricate any style, need or options required.

- Constructed in various different plastic corrosion resistant sheets
- Designed to be built into the wall of the facility or mounted
- Internal piping & valves for the truck to hook up to
- Hinged and locked door
- Entirely protected from the environment

## PUMP LIFT STATIONS

Pump stations are a great solution for transferring or lifting chemical waste overhead when a gravity drain is not available. We offer many different styles and configurations to meet our customers most demanding requirements.

Every sump is fabricated out of rugged chemical resistant material along with a wide range of flow, head capabilities and styles of pumps. We also offer many different styles of level sensors and control panels to meet your needs and desires.

- Material: Polyethylene, Polypropylene, PVC, CPVC, Stainless Steel, PVDF, etc
- Simplex, duplex or triplex configurations
- Direct burial tanks
- Style of pumps, submersible, vertical, horizontal, air operated
- Pre-tested package

## CUSTOM FABRICATED TANKS

Our custom fabricated tanks are used for a wide range of applications; water and chemical storage, water treatment systems, pH adjustment systems, pump stations, plastic manholes, etc. We can design and fabricate any style of tank you might need to meet your requirements. The tanks can be constructed out of polyethylene, polypropylene, PVC, CPVC, PVDF and stainless steel with many different styles of fittings, internal or external supports and covers.

- Custom designed to meet your needs
- CAD drawings provided for approval
- Optional field fabricated/installed

## CUSTOM DESIGN & FABRICATION

ASI has over 45 years experience with plastic pipe, valves and fittings. Our experience and superior product line can provide a wide range of custom items from simple cut-to-size pipe and sheet to RODI balancing assemblies.

Our technicians are trained in various different methods and techniques of plastic fusion from extrusion welding to IR/BCF welding. We also offer plastic welding equipment, socket and butt fusion machines, electrofusion machines, IR machines and various other rental equipment.

- Custom PLC control panels
- Piping assemblies
- pH, flow, chlorine, etc. Monitoring
- High purity hose assemblies
- Fume hoods
- Experienced, certified technicians
- Valve boxes
- Cost effective
